Foreword

WE TAKE PLEASURE in sending our 10th Anniversary Catalog. Since a tenth birthday is always rather a special event, we are helping to make it one by improving our catalog this year with the addition of some attractive color plates which we hope you will enjoy.

We are also going all out this year to put on the finest Iris display that we have ever had. Nature cannot be hurried so it has taken considerable time and thought to develop and landscape our gardens the way we wanted to have it since moving to this location seven years ago. It now is becoming to have a more mellow, established look and a fit setting for the many beautiful new Iris creations that it contains.

To our growing number of customers we extend greetings and offer our sincere thanks for your valued patronage and support. The many fine orders, in increasing numbers of the past years, have enabled us to grow to the point where we can now say that we have one of the finest commercial Iris Gardens in the east. We have also proven that good Iris which will give customers top quality performance in their gardens can be raised here in this part of the country as well as on the West Coast.

We look forward to hearing from and seeing our old customers and friends this coming season. We hope that your Iris will give you much pleasure and a few thrills this Spring — enough so that you will want to add some of the wonderful newer varieties to your plantings.

To you who have requested this catalog — we hope that you will see fit to send us a trial order. We pledge that it will receive the best of attention from the time of a prompt acknowledgement to the time the Iris order reaches your door. We feel certain that you will be so pleased with the results in your garden that you will be an Iris fan and a Cherry Hill customer as well for years to come.

OLIVER W. HOLTON

Do Come and See Us

The latchstring is always out: you are as welcome as the flowers! To fully appreciate the full charm, beauty and grace of modern bearded Iris they must be seen—pictures and descriptions in print are poor substitutes for the actual viewing. So by all means pay us a visit during the blooming season if you are within driving distance. We have many visitors who come two and three times every season and from considerable distances. We urge you to make the effort because we feel certain that you will find it worthwhile. You may come and just browse around to your heart's content if you want to. No pressure whatsoever is made on a visitor to place an order — except of course by the Iris themselves. (See map on page 36.)

THE BEST TIME

At our location the early varieties start blooming the middle of May and the later varieties finish blooming by the middle of June. The best period to come in order to see almost all in bloom is from May 21st to June 6th. The **peak bloom** period usually is May 28th to June 2nd. We are always about **six days behind** the Philadelphia area—so kindly note that fact Philadelphians! The reason for this is due mostly to our higher exposed location. If you are in doubt as to the best time, suggest that you telephone us before coming—Tel. Springtown 6-7836.

THE PLACE

Our gardens are located one-half mile west of Route 212 in upper Bucks County at Pleasant Valley; watch for turn at the north end of the village. Our sign posts will guide you when nearing Pleasant Valley.

PLEASE NOTE

If You Visit Our Gardens During The Blooming Season, And We Hope That You Will, Kindly Bring This Catalog With You When You Come.

Terms

Cash with order please—making checks or money orders payable to Cherry Hill Iris Gardens. Sorry but no C.O.D. shipments. We have no minimum but since postal charges are now very high, we must ask that customers living east of the Miss. River, add .40¢ to any order under \$4.00. Those west of the Miss. River add same for any order under \$5.00.

Shipments and Planting

We will commence filling orders this year on July 7th and continue until October 1st. Please do not ask for them earlier or later than these dates. Bearded Iris may be planted anytime from early July until the 1st of October. July and August is recommended for northern New York State and New England. We plant later but it means proper protection and "servicing" them during the winter if there is evidence of heaving and most people do not want that trouble—hence our recommendations. Cultural directions are enclosed in each shipment.

Guarantee

Every rhizome will be freshly dug, large, vigorous and well rooted. They will be free from disease and insect pests and packed with greatest of care so as to reach you in perfect condition. Every rhizome is labeled with a copper wired printed wooden label true to name. No substitutions are made unless you so indicate on your order blank. (We might add here that customers who permit substitutions are **always** the gainers.)

We will replace free any Iris that does not meet with your approval or does not grow after planting providing this is reported before October 15th. (Please do not ask us to replace Iris lost by winter-kill. We do not feel that we should be held responsible for the planting location, care or for growing conditions beyond our control.) In the event there is an error in labeling, mistake will be rectified with a double replacement the following season on report from you immediately after the blooming season.

Our gardens are licensed and inspected by the Penna. Dept. of Agriculture. All shipments to areas outside the Jap. Beetle Zone are inspected and stamped by the U.S. Dept. of Agriculture.

You Select Your Own Extras

We like to give good measure to all our customers, so rather than run the chance of giving you varieties which you might already have or possibly would not care for, we allow you to select your own free, extra Iris as below, depending on the size of your order. The constantly increasing parcel post rates, in addition to the ever-mounting labor costs of producing and shipping top grade Iris, make it necessary to encourage larger orders. Hence, the larger the order, the greater the allowance in free Iris.

Please give second choices for your extras in case we are sold out of some of the varieties requested. We always make every effort to give as many first choices as possible.

ON ORDERS OF \$ 5.00 OR MORE — Select additional Iris up to 15 % in value.

ON ORDERS OF \$10.00 OR MORE — Select additional Iris up to 20 % in value.

OUR NEW IRIS INTRODUCTION

For 1955

We take great pleasure this year in offering for introduction this year an Iris by the well-known hybridizer, Mr. William J. McKee of Worcester, Mass.

Mr. McKee, president of the American Iris Society, 1940 thru 1942, began hybridizing Iris as a hobby in 1923 and has been at it ever since. He is now one of the most ardent advocates of line breeding and the results have been highly favorable. Some of his best known originations are Mary Vernon, Moontide, Fairday, Miogem, Miobelle, Ponder, Orange Gem, Mayan Gold, Pequot and Terrific.

He won the medal for Distinguished Service to the Society in 1943 and on Nov. 1st, 1953 he won the Hybridizer's Medal of the Society. He is only the second person to have received both medals. Mr. McKee is also co-author of the new book "Half Century of Iris," published last year

IRIS FOR EVERY GARDEN

By Sydney B. Mitchell

The most up-to-date and complete book on Iris ever written with all basic information for amateurs and for specialists, an authentic discussion of species and varieties all over the world. With this book as guide you can select Irises to bloom from 3 to 12 months a year depending on where you live and what you plant—familiar bearded, the Japanese, Siberian, Louisiana types, or certain rare and fascinating species. Dr. Mitchell has grown Iris for 50 years, has himself developed new varieties, and shows you the way to special satisfaction with this "finest hardy perennial."

WHAT EVERY IRIS GROWER SHOULD KNOW

A new 34-page booklet recently published by the American Iris Society. While its primary purpose is to serve as a manual to be given free to new members, it is a booklet that is packed with so much valuable information of great interest to the novice and the dyed-in-the-wool "Iris fan," that it should be in any Iris lover's library. It is exceptionally well illustrated with photographs and drawings.

The A.I.S. has kindly offered to make several hundred copies available for our disposal to interested customers. They are being sold at their actual cost which is 25 cents postpaid. So we recommend that you order your copy of this excellent booklet while the supply lasts. We will gladly handle the order for you.

PERMARKERS

PERmanent MARKers For Plants

PERMARKERS, the new garden marker, meets **all** the exacting labeling requirements of discriminating gardeners and growers. They were designed after years of research and after testing all ordinary labels now on the market. We have used them for the past eight years.

The label is made of gray-green durable thick plastic. This label is most harmonizing in the garden. A special waterproof pencil is used. Writing remains legible for years but can be easily erased for re-use.

The supports are made of Bethanised steel which is light, rigid, durable and non-corrosive. They will not turn or heave and hold the labels firmly at a readable angle—never spattered and always clean. Labels easily removed from supports.

Postpaid prices are as follows:

	Complete	Labels only
10 Permarkers, supports and labels	\$ 1.50	\$.75

GRAY'S IRIS BORER ERADICATOR

Endorsed and used by leading Iris Growers

This solution is easily applied by spraying the Iris leaves — two applications during the growing season, means "sure death" to the borer. First application should be made early in the spring just after the Iris has started growth. Not expensive as two tablespoonsful makes one quart of spray. One quart makes $8\frac{1}{4}$ gallons of spray mixture. Complete directions are on label.

Pint tin, postpaid — \$1.80, taken at our gardens — \$1.50

Quart tin, postpaid — \$2.80, taken at our gardens — \$2.50

IRIS AS A GIFT

If you have a friend, relative or good business customer interested in flower gardening, you would make them very happy by sending one of our numerous special Iris Collections as a gift. Donor's card will be enclosed with the shipment—either, one you send (no writing however except your signature on account of postal regulations) or one supplied by us showing your name. Each year more and more of these growing and lasting gifts are ordered by our customers. If a special date of delivery is desired, it is necessary to order at least two weeks in advance.

WE CONTINUALLY STRIVE TO PLEASE OUR CUSTOMERS AND JUDGING FROM THE MANY FINE LETTERS WHICH WE RECEIVE EVERY YEAR FROM SATISFIED CUSTOMERS, IT LOOKS LIKE WE USUALLY SUCCEED. BELOW WE PROUDLY PRESENT EXCERPTS FROM SOME OF THESE LETTERS.

My Iris order arrived the day after I had written to ask about it. The stock is the usual good and healthy looking material that I have grown to look for from your place and I am looking forward to a treat come spring.

I now have twenty four of your plants growing in an inner court yard between tall building in the heart of New York City—all have done so well and all the neighbors are as eager and delighted with their bloom as I am myself—thanks again.

NEW YORK, N. Y.

We missed seeing you on our annual visit to your lovely Iris gardens this year. We came later than usual and did not expect to find so much beauty and loveliness so late in the season, but as always it was breathtakingly beautiful—My order last year contained the fine fat rhizomes you always send.

SCHENKSVILLE, PENNA.

Your shipment of August 17th reached us the other day and we are pleased to report that they all came thru in excellent condition. The quality of your stock is very fine and we are very much pleased.

PITTSBURGH, PENNA.

Much pleased with the Iris plants which you sent. They are all extra fine and strong in every way. Many thanks for the extra ones.

NEWTOWN, CONN.

Thank you very much for your prompt shipment of my 1954 Iris order, received yesterday.

Better than 80 % of my previous year's iris produced bloom this year, and we were quite delighted with them. There was no borer damage, as we sprayed them with Gray's borer eradicator.

PHILADELPHIA, PENNA.

Thought I would write and tell you that the Iris bought from you in August are doing fine and made very good growth. Looks like we will get some fine bloom from them next spring. Thanks for the nice plants you sent.

WESTVILLE, OKLAHOMA

The Iris arrived in fine condition. Your plants are very healthy and clean—we will recommend and do business with you again in the future.

YEADON, PENNA.

Just a note to tell you that all the rhizomes you sent have made excellent growth. One of the pinks actually had five fans on it at the end of the season and all had put up two or more. Happy Birthday had three! I must say that your root systems are wonderful. I have gotten so enthusiastic that I not only joined the Iris Society but am planning a couple of new beds for the newer iris, so I'll be up again this spring. Am anxious to get your 1955 catalog—the old one is nearly worn out!

ROSE VALLEY, PENNA.

I received my order today together with the free Iris. They are in good condition and are fine strong rhizomes.

LEWISBURG, TENN.

I received the Iris promptly and had them in the ground the same day. They are fine strong plants and I am greatly pleased with them. Thanks so much for Spanish Cream which you sent me gratis—it must have been mental telepathy as I had it marked to order and then overlooked it. I am going to visit you during the next blooming season.

ATLANTIC HIGHLANDS, NEW JERSEY

Package arrived in very good condition. All nice looking rhizomes. Thanks a lot for Moonlight Sonata and Confetti. I got them all planted this morning. Hope to see you next year.

NORRISTOWN, PENNA.

Your shipment of Iris are all planted and I want to thank you for your generous interpretation of the order. So far I have only forty varieities of bearded Iris, and a dozen or so of other types but you will hear again from me next year.

CORNWALL BRIDGE, CONN.

After seeing your Iris Gardens this spring for the first time I knew that I could not let another year go by without having some in my garden.

We saw so many varieties we were just wild about in your gardens but will have to wait until the budget allows us to get them. In the meantime we know that we will be making many trips to Pleasant Valley in the future and also introduce our friends to the wonders of the new, modern Iris.

FULLERTON, PENNA.

My order just received and in wonderful fresh condition. I am so pleased with the bonus Iris which you enclosed and thank you very much. I surely am looking forward to spring.

MERCHANTVILLE, NEW JERSEY

Both shipments of Iris arrived in splendid condition and have already been well taken care of. I have **never** seen finer rhizomes—All of your rhizomes were so large and well started for next year. Thank you for the free Iris and for the extra Iris for calling for the order.

WEST CHESTER, PENNA.

Your recent shipment of Iris arrived in good time and were planted within an hour of their arrival. The rhizomes were in good, healthy condition. Considering the fact that all of these plants have been planted only a week in my garden and **all are already growing**, it is clear that they suffered imperceptibly in the shipping and transplanting.

ALTAMONT, NEW YORK

Your shipment of Iris came today—just on time as I had asked. They are all such beautiful roots as I shall report to my garden club. I know several of our members have ordered from you this year. Thank you so much for the free roots.

WAYNE, PENNA.

I am still under the spell of your wonderful garden and only wish that I could afford more of your flowers. Hope to add slowly to my collection as the years go by.

PAINTED POST, NEW YORK

I received my Iris today in **perfect** condition—they surely are wonderful! Thank you so much for the free ones.

LEHIGHTON, PENNA.

Your shipment of Iris was received this week in fine condition and are already planted. I was very much surprised to receive a bonus of two very welcomed varieties and wish to thank you for your thoughtful selection of just the right colors. I would like to order every variety listed, but with a small garden one must go slowly.

EVERY GARDEN SHOULD HAVE SOME IRIS PLANTINGS

Bearded Iris are considered the ideal perennial. They are easy hardy, quite easy to grow and practically free from diseases and insect pests.

The basic needs for best results are drainage, sun and a moderate amount of feeding. Iris cannot stand wet ground or standing water for a long period without rotting—hence a slight slope or raised beds are desirable. They may be planted in full sun or partial shade but in order to bloom well there should be at least a half a day of sun. Bone meal is the safest food and should be worked in the ground around the plants early in the spring. Super-phosphate is quicker acting—should be kept away from rhizomes however. Well rotted cow manure is very good if worked into the ground well *before* planting and kept away from the rhizomes.

Iris are not particular about the soil—of course a light, well drained fertile garden soil is best but they will grow in sandy or clay soil. We have them growing equally well in slightly alkaline and slightly acid soil.

The range in color is more extensive than in any other flower and with the various blends, by-colors, plicatas and variegatas, the variety to choose from is almost unlimited.

Iris not only give wonderful color value and added beauty to your garden, but are excellent as cut flowers for the house. A stalk, if cut when the top flower is opening, will last a week or longer.
